Subject index*

A

Abetalipoproteinemia and hypobetalipoproteinemia, genetic relationship of, a report of occurrence of both diseases within the same family, 556
Absorption, calcium, as function of calcium intake, 881
Acidification, abnormal renal, in alcoholic liver disease, 987
Aciduria, orotic, hereditary, results of screening survey, 287
Adenine, 2,3-diphosphoglycerate, and hypoxanthine nucleotide synthesis in outdated human erythrocytes, effect of inosine, pyruvate, and inorganic phosphate on, 436
Albumin, serum, hyperoncotic human, anion excretion pattern following infusion of, into dogs, 416
Alcoholic, collagen biosynthesis in liver disease of, 103
Aldosterone, plasma, concentration in normal recumbent man, effect of dexamethasone on control of, 957
Amyloids, myeloma associated, antigenicity and cross-reactivity of denatured fibril proteins of primary, secondary, and, 650
Anaerobic culture media, measurement of redox potential changes in, caused by addition of blood, 174
Analysis, trace element, application of, by x-ray fluorescence, human blood serum, 155
Anaphylactic transfusion reactions caused by antibodies to IgA, healthy blood donors with selective absence of immunoglobulin A, prevention of, 838
Anemia, aplastic, co-existent, chronic mucocutaneous candidiasis with macrophage dysfunction, a plasma inhibitor, and, 968
  dyserythropoietic, congenital, Type II (HEMPAS), abnormal lipid composition of red cell membrane in, 34
  pernicious, cellular immunity to intrinsic factor in, 87
Angiotensin-salt hypertension, pathophysiology of, 734
Anglo-Saxon attitudes, some, research, 707
Anion excretion pattern following infusion of hyperoncotic human serum albumin into dogs, 416
Antibodies, complement-fixing, in symptomatic and asymptomatic pigeon breeders, immunologic studies in hypersensitivity pneumonitis, quantitative precipitins and, 540
Antigen, hepatitis B surface, in saliva of HB_sAg carriers, 1042
Aorta, canine thoracic, scanning and transmission electron microscope study of luminal coating on Dacron prostheses in, 208
Aortic root, comparison of His bundle electrograms recorded from, and from a plaque sutured near the His bundle, 711
Aryl acid content and secretory activity of serum, urine, and cerebrospinal fluid in normal and uremic man, 723
Attitudes, Anglo-Saxon, some, research, 707

B

Bacteria, Gram-negative, rheumatoid behavior in normal human synovial fibroblasts induced by extracts of, 422
Baroreceptors, carotid, simplified neck suction device for activation of, 167
Beta-thalassemia trait in subjects with microcytosis, measurement of free erythrocyte porphyrin as a simple means of distinguishing iron deficiency from, 113
Bile, nonchromatographic colorimetric assay for total taurine-conjugated bile acids, application of measurements of glycine: taurine ratio in, 505
Biliary lipids in hamster, persistent effects of chenodeoxycholic acid on, 1032
Biological defense mechanisms, evidence for participation of superoxide in bacterial killing by xanthine oxidase, 235
Biosynthesis, collagen, in liver disease of the alcoholic, 103
Blood cells, viable, concurrent separation of plasma and, 342
  cleansing modality, clinical characterization of new, kinetics of hemodiafiltration, 372
  clotting systems, alteration of factor VII activity by activated Fletcher factor (a plasma kallikrein), a potential link between the intrinsic and extrinsic, 405
  coagulation, factors affecting the evolution of factor XIa during, 826
  donors, healthy, with selective absence of immunoglobulin A, prevention of anaphylactic transfusion reactions caused by antibodies to IgA, 838
  measurement of redox potential changes in anaerobic culture media caused by addition of, 174

*January, pp. 1-180; February, pp. 181-350; March, pp. 351-526; April, pp. 527-706; May, pp. 707-878; June, pp. 879-1064.

Blood cells—cont'd
samples, sequential, from tail vein of rats and mice obtained with modified Liebig condenser jackets and vacuum, 523
Bowel, small, transit time, investigation of, in man, utilizing pulmonary hydrogen (H_2) measurements, 546

C

Calcium absorption as function of calcium intake, 881
transport, duodenal, effect of ethanol ingestion on, 665
Candida serum precipitins, clinical application of counterimmunoelectrophoresis in detection of, 161
Candidiasis, chronic mucocutaneous, with macrophage dysfunction, a plasma inhibitor, and coexistent aplastic anemia, 968
Canine thoracic aorta, scanning and transmission electron microscope study of luminal coating on Dacron prostheses in, 208
Carbamyl phosphate, enzymatic determination of, in blood, 694
Cardioactive drugs, automatic device for isolated rabbit heart preparation for testing of, 703
Carotid baroreceptors, simplified neck suction device for activation of, 167
Catecholamine assay, precise, for small plasma samples, 678
Cell-mediated immunity in systemic lupus erythematosus, alterations with advancing age, 132
Cells, red blood, sorbitol-oxidizing enzyme of, 645
Cellular immunity to intrinsic factor in pernicious anemia, 87
Centrifugation, coil planet, and its application to the observation of altered membrane properties of erythrocytes in hepatobiliary disorders, 855
zonal, large-scale isolation of renin-containing granules from rabbit renal cortex by, 467
Cerebrospinal fluid, urine, and serum in normal and uremic man, secretory activity and aryl acid content of, 723
Chemoreflex, coronary, efferent pathways for, 898
Chemotactic factor, studies on crystal-induced, role of phagocytosis, 631
Chemotaxis, defective regulation of, in cirrhosis, 621
Chenodeoxycholic acid, persistent effects of, on biliary lipids in hamster, 1032
Chloramphenicol and penicillin in streptococcal endocarditis in rabbits, antagonism between, 307
Chronic obstructive lung disease, impaired water handling in, 41
Cirrhosis, defective regulation of chemotaxis in, 621
Coagulation, blood, factors affecting the evolution of factor XIa during, 826
disseminated intravascular, induced by endotoxin, mechanisms, prevention by glucocorticoids of, 934
Cobalt excretion test as index of iron absorption and diagnostic test for iron deficiency, 253
Coil planet centrifugation and its application to the observation of altered membrane properties of erythrocytes in hepatobiliary disorders, 855
Collagen biosynthesis in liver disease of the alcoholic, 103
Colorimetric assay, new, for monoamine oxidase in serum and its clinical application, 1022
nonchromatographic, for total taurine-conjugated bile acids, application of measurements of glycine: taurine ratio in bile, 505
Compartmental models, structural analysis of, for hepatic kinetics of drugs, 865
Concanavalin A-Sepharose, placental acid hydrolase purification on, 672
Condenser jackets and vacuum, Liebig, sequential blood samples from tail vein of rats and mice obtained with modified, 523
Connective tissue activation, evidence supporting a role for prostaglandins and cyclic nucleotides, 392
Coronary chemoreflex, efferent pathways for, 898
heart disease, hyperlipidemia in, biochemical genetic approach, 15
Cortex, renal, rabbit, large-scale isolation of renin-containing granules by zonal centrifugation, 467
Counterimmunoelectrophoresis, clinical application of, in detection of candida serum precipitins, 161
Culture media, anaerobic, measurement of redox potential changes in, caused by addition of blood, 174
Cyanate, enhancement of filterability of sickle cells by, effect independent of oxygen saturation, 445
Cyanate-induced alterations in hepatic glycogen metabolism, in vivo hepatic and intestinal toxicity of sodium cyanate in rats, 140

D

Dacron prostheses, in canine thoracic aorta, scanning and transmission electron microscope study of luminal coating on, 208
Delta-aminolevulinic acid, erythrocyte, dehydratase activity as measure of lead exposure, 746
Dexamethasone, effect of, on control of plasma aldosterone concentration in normal recumbent man, 957
Diabetes, experimental, enhancement of intestinal sucrase activity in, role of intraluminal factors, 832
mellitus, neutrophil dysfunction in, 26
Diethylenetriaminepentaacetic acid, study of chelating agent, using selective radioiron probes of reticuloendothelial and parenchymal iron stores, 913
Digitoxin and digoxin, reactivity of derivatives of, as measured by Na-K-ATPase displacement assay and by radioimmunoassay, 610
Digoxin and digitoxin, reactivity of derivatives of, as measured by Na-K-ATPase displacement assay and by radioimmunoassay, 610
2,3-Diphosphoglycerate, adenine, and hypoxanthine nucleotide synthesis in outdated human erythrocytes, effect of inosine, pyruvate, and inorganic phosphate on, 436
Dismutase activity, red cell superoxide, estimation of, 337
Dogs, anion excretion pattern following infusion of hyperoncotic human serum albumin into, 416

Dopamine-β-hydroxylase, serum, in familial dysautonomia, 1008
Drugs, cardioactive, automatic device for isolated rabbit heart preparation for testing of, 703
structural analysis of compartmental models for hepatic kinetics of, 865
Dysautonomia, serum dopamine-β-hydroxylase in familial, 1008
Dyserythropoietic anemia, congenital, Type II (HEMPAS), abnormal lipid composition of red cell membrane in, 34

E

Ecumenicalism, aqua regia of, 527
EDTA, effect of heparin and, on NBT test, 950
Editorial, 1
guest, 183
Education, medical, and research, effects on, public opinion, 8
Electrograms, His bundle, comparison of, recorded from aortic root and from plaque sutured near His bundle, 711
Electron microscope study, scanning and transmission, of luminal coating on Dacron prostheses in canine thoracic aorta, 208
Endocarditis, streptococcal, in rabbits, antagonism between chloramphenicol and penicillin in, 307
Endotoxin, prevention by glucocorticoids of disseminated intravascular coagulation induced by mechanisms, 934
Enzymes, characterization of erythrocyte membrane-associated (glyceraldehyde-3-phosphate dehydrogenase and phosphoglyceric kinase), 797
Epinephrine, time-dependent increase in responsiveness of platelet-rich plasma to, 300
Erythrocytes, abnormal, evaluated by response to shear stress, fragility of, 67
altered membrane properties of, in hepatobiliary disorders, coil planet centrifugation and its application to the observation of, 855
delta-aminolevulinic acid dehydratase activity as measure of lead exposure, 746
membrane-associated enzymes, characterization of, (glyceraldehyde-3-phosphate dehydrogenase and phosphoglyceric kinase), 797
outdated human, effect of inosine, pyruvate, and inorganic phosphate on 2,3-diphosphoglycerate, adenine, and hypoxanthine nucleotide synthesis in, 436
porphyrin, free, measurement of, as a simple means of distinguishing iron deficiency from beta-thalassemia trait in subjects with microcytosis, 113
Ethanol-ammonium acetate, sensitive, rapid, and economic radioimmunoassay of human growth hormone using, 497
ingestion, effect of, on duodenal calcium transport, 665

F

Factor VII activity, alteration of, by activated Fletcher factor (a plasma kallikrein), a potential link between intrinsic and extrinsic blood clotting systems, 405
Factor VII—cont'd
XIa, factors affecting the evolution of, during blood coagulation, 826
XIIIa, cross-linking of fibrinogen and fibrin by fibrin-stabilizing factor, 574
Fibrin and fibrinogen, cross-linking of, by fibrin-stabilizing factor (factor XIIIa), 574
Fibrinogen, cross-linking of, and fibrin by fibrin-stabilizing factor (factor XIIIa), 574
Fibroblasts, cultured human, porphyrin synthesis and mitochondrial respiration in acute intermittent porphyria, studies using, 93
synovial, human, normal, induced by extracts of Gram-negative bacteria, rheumatoid behavior in, 422
Fibrol proteins, denatured, antigenicity and cross-reactivity of, primary, secondary, and myeloma associated amyloids, 650
Fletcher factor, activated, alteration of factor VII activity by, (a plasma kallikrein), a potential link between intrinsic and extrinsic blood-clotting systems, 405
Fluorescence, x-ray, to human blood serum, application of trace element analysis by, 155
Folate metabolism, effect of oral contraceptives on, plasma clearance and urinary folate excretion, 185
FSH and LH, effect of pH on radioimmunoassay of, 515

G

Globin synthesis in subjects doubly heterozygous for hemoglobin G-Philadelphia and hemoglobin S or C, 891
Glomerulonephritis, glomerulotubular relationships in, 292
Glomerulotubular relationships in glomerulonephritis, 292
Glucocorticoids, prevention by, of disseminated intravascular coagulation induced by endotoxin, mechanisms, 934
Glucose and fatty acid, metabolism of, by leukocytes from patients with endogenous hypertriglyceridemia, 588
plasma insulin levels in diabetic rats prior to and following islet transplantation, 74
Glycogen metabolism, hepatic, in vivo hepatic and intestinal toxicity of sodium cyanate in rats, cyanate-induced alterations in, 140
Gram-negative bacteria, rheumatoid behavior in normal human synovial fibroblasts induced by extracts of, 422
Granule, renal papillary, morphological study of, analysis in interstitial cell and in the interstitium, 121
Granulocytes, human, quantitative aspects of production of superoxide radicals by, 245
production of hydrogen peroxide by phagocytizing human, 198
Granulomatous disease, chronic, sex-linked, influence of phorbol myristate acetate on metabolism of neutrophils from carriers of, 82
Graves disease, relationship of thyroxine turnover to other parameters of peripheral thyroid function in, 922
Growth hormone, human, sensitive, rapid, and economic radioimmunoassay of, using ethanol-ammonium acetate, 497

H

Hamster, persistent effects of chenodeoxycholic acid on biliary lipids in, 1932
HB_sAg carriers, hepatitis B surface antigen in saliva of, 1042
Heart disease, coronary, hyperlipidemia in, biochemical genetic approach, 15
Hemodiafiltration, kinetics of, in vitro transport characteristics of hollow-fiber blood ultrafilter, 355
Hemodialysis, effect of, on factors influencing oxygen transport, 978
leukopenia and polymorph random mobility, possible correlation, 191
Hemoglobin E, an oxidatively unstable mutation, 531
G-Philadelphia and hemoglobin S or C, globin synthesis in subjects doubly heterozygous for, 891
oxygen affinity on micro samples, determination of, 329
S or C, globin synthesis in subjects doubly heterozygous for hemoglobin G-Philadelphia and, 891
Heparin, effect of, and EDTA on NBT test, 950
one-stage assay of, 843
Hepatic glycogen metabolism, in vivo hepatic and intestinal toxicity of sodium cyanate in rats, cyanate-induced alterations in, 140
kinetics of drugs, structural analysis of compartmental models for, 865
Hepatitis B surface antigen in saliva of HB_sAg carriers, 1042
Type A, potency of fragmented IgG, two studies of postexposure prophylaxis in, 281
Hepatobiliary disorders, coil planet centrifugation and its application to the observation of altered membrane properties of erythrocytes in, 855
Heterogeneity, functional, of transferrin-bound iron, in vivo evidence for studies in normal rats, 769
in pregnant rats, 785
His bundle electrograms, comparison of, recorded from aortic root and from plaque sutured near His bundle, 711
Hollow-fiber blood ultrafilter, in vitro transport characteristics of, kinetics of hemodiafiltration, 355
Hormone, growth, human, sensitive, rapid, and economic radioimmunoassay of, using ethanol-ammonium acetate, 497
Hydrogen peroxide, production of, by phagocytizing human granulocytes, 198
pulmonary (H_2), measurements, investigation of small bowel transit time in man utilizing, 546
Hyperlipidemia, in coronary heart disease, biochemical genetic approach, 15
Hypertension, pathophysiology of angiotensin-salt, 734
Hypertriglyceridemia, endogenous, metabolism of glucose and fatty acid by leukocytes from patients with, 588
Hyperviscosity syndrome, studies of, macroglobulinemia, 227
Hypobetalipoproteinemia and abetalipoproteinemia, genetic relationship of, a report of occurrence of both diseases within the same family, 556
Hypothyroid man, impaired renal tubular reabsorption of sodium, in 451
Hypoxanthine nucleotide synthesis, 2,3-diphosphoglycerate and adenine in outdated human erythrocytes, effect of inosine, pyruvate, and inorganic phosphate on, 436

I

IgA, healthy blood donors with selective absence of immunoglobulin A, prevention of anaphylactic transfusion reactions caused by antibodies to, 838
IgG, fragmented, potency of, two studies of postexposure prophylaxis in Type A hepatitis, 281
Immunity, cell-mediated, in systemic lupus erythematosus, alterations with advancing age, 132
cellular, to intrinsic factor in pernicious anemia, 87
Immunoglobulin A, healthy blood donors with selective absence of, prevention of anaphylactic transfusion reactions caused by antibodies to IgA, 838
Immunoglobulins, salivary, and streptococcal antibodies in patients with acute rheumatic fever, 1013
Inosine, pyruvate, and inorganic phosphate, effect of, on 2,3-diphosphoglycerate, adenine, and hypoxanthine nucleotide synthesis in outdated human erythrocytes, 436
Insulin, plasma, and glucose levels in diabetic rats prior to and following islet transplantation, 75
Intake, calcium, calcium absorption as function of, 881
Interstitial cell and interstitium, morphological study of renal papillary granule, analysis of, 121
Interstitium, morphological study of renal papillary granule, analysis in the interstitial cell and in the, 121
Intestinal sucrase activity, enhancement of, in experimental diabetes, role of intraluminal factors, 832
Intraluminal factors, enhancement of intestinal sucrase activity in experimental diabetes, role of, 832
Intrinsic factor in pernicious anemia, cellular immunity to, 87
Investigator, clinical, broad responsibility of, 191
Iron absorption and diagnostic test for iron deficiency, cobalt excretion test as index of, 253
Iron deficiency, measurement of free erythrocyte porphyrin as a simple means of distinguishing from beta-thalassemia trait in subjects with microcytosis, 113
stores, reticuloendothelial and parenchymal, study of chelating agent diethylenetriaminepentaacetic acid using selective radioiron probes of, 913
transferrin-bound, in vivo evidence for functional heterogeneity of, studies in normal rats, 769
transferrin-bound, in vivo evidence for functional heterogeneity of, studies in pregnant rats, 785
Islet transplantation, plasma insulin and glucose levels in diabetic rats prior to and following, 75

K

Kidney cells, human embryonic, thrombopoietin production by, in culture, 59
Kinetics of hemodiafiltration, in vitro transport characteristics of hollow-fiber blood ultrafilter, 355

Kinetics of hemodiafiltration—cont'd
hepatic, of drugs, structural analysis of compartmental models for, 865

L

Lead exposure, erythrocyte delta-aminolevulinic acid dehydratase activity as measure of, 746
Leukocytes, effect of plasma, steroids, or steroid products on adhesion of human opsonized thrombocytes to human, 478
metabolism of glucose and fatty acid by, from patients with endogenous hypertriglyceridemia, 588
release of osteoclast activating factor by normal human peripheral, 1001
Leukocytosis, pseudohyperkalemia and extreme, 660
Leukopenia, hemodialysis, and polymorph random mobility, possible correlation, 191
LH and FSH, effect of pH on radioimmunoassay of, 515
Liebig condenser jackets and vacuum, sequential blood samples from tail vein of rats and mice obtained with modified, 523
Lipid composition, abnormal, of red cell membrane in congenital dyserythropoietic anemia Type II (HEMPAS), 34
Lipoproteins, high-density, of human plasma, transport of triglyceride in, 260
Liver disease, alcoholic, abnormal renal acidification in, 987
of the alcoholic, collagen biosynthesis in, 103
rat, nitrogen metabolism in perfused cirrhotic, 273
tissue and skeletal muscle in normal and dietary controlled alcoholic rats, distribution of zinc in, 50
Lupus erythematosus, systemic, alterations with advancing age, cell-mediated immunity in, 132

M

Macroglobulinemia, studies of hyperviscosity syndrome, 227
Macrophage dysfunction, chronic mucocutaneous candidiasis with, a plasma inhibitor, and coexistent aplastic anemia, 968
M.D.—Ph.D. program, University of Miami School of Medicine, 351
Medical education and research, effects on, public opinion, 8
Membrane, red cell, in congenital dyserythropoietic anemia Type II (HEMPAS), abnormal lipid composition of, 34
Metabolism, folate, effect of oral contraceptives on, plasma clearance and urinary folate excretion, 185
hepatic glycogen, in vivo hepatic and intestinal toxicity of sodium cyanate in rats, cyanate-induced alterations in, 140
of glucose and fatty acid by leukocytes from patients with endogenous hypertriglyceridemia, 588
Methylmalonic and proprionic acids in urine, simplified and rapid quantitative assay for, 487
Mice and rats, sequential blood samples from tail vein of, obtained with modified Liebig condenser jackets and vacuum, 523
Microcytosis, measurement of free erythrocyte porphyrin as a simple means of distinguishing iron
Microcytosis—cont'd
deficiency from beta-thalassemia trait in subjects with, 113
Mitochondrial respiration and porphyrin synthesis in acute intermittent porphyria, studies using cultured human fibroblasts, 93
Monoamine oxidase in serum, new colorimetric assay for, and its clinical application, 1022
Morality, stretch of, by author-investigators, too, 879
Muscle, skeletal, and liver tissue in normal and dietary controlled alcoholic rats, distribution of zinc in, 40
Mutation, hemoglobin E, oxidatively unstable, 531
Myeloma associated amyloids, antigenicity and cross-reactivity of denatured fibril proteins of primary, secondary, and, 650

N

Na-K-ATPase displacement assay, reactivity of derivatives of digoxin and digitoxin as measured by, and by radioimmunoassay, 610
NBT test, effect of heparin and EDTA on, 950
Neck suction device, simplified, for activation of carotid baroreceptors, 167
Neutrophil dysfunction in diabetes mellitus, 26
from carriers of sex-linked chronic granulomatous disease, influence of phorbol myristate acetate on metabolism of, 82
Nitrogen metabolism in perfused cirrhotic liver of rat, 273
Nucleotides, cyclic, and prostaglandin, evidence supporting a role for, connective tissue activation, 392

O

Oral contraceptives, effect of, on folate metabolism, plasma clearance and urinary folate excretion, 185
Orotic aciduria, hereditary, results of screening survey, 287
Osteoclast, release of, activating factor by normal human peripheral blood leukocytes, 1001
Oxygen saturation, enhancement of filterability of sickle cells by cyanate, effect independent of, 445
transport, effect of hemodialysis on factors influencing, 978

P

Paraformaldehyde, platelets fixed with, new reagent for assay of von Willebrand factor and platelet aggregating factor, 318
Penicillin and chloramphenicol, in streptococcal endocarditis in rabbits, antagonism between, 307
Phagocytosis, role of, studies on crystal-induced chemotactic factor, 631
Phorbol myristate acetate, influence of, on metabolism of neutrophils from carriers of sex-linked chronic granulomatous disease, 82
Phosphate, inorganic, inosine, pyruvate, effect of, on 2,3-diphosphoglycerate, adenine, and

Phosphate—cont'd
hypoxanthine nucleotide synthesis in outdated human erythrocytes, 436
Pigeon breeders, symptomatic and asymptomatic, immunologic studies in hypersensitivity pneumonitis, quantitative precipitins and complement-fixing antibodies in, 540
Placental acid hydrolase purification on concanavalin A-Sepharose, 672
Plasma aldosterone concentration in normal recumbent man, effect of dexamethasone on control of, 957
concurrent separation of, and viable blood cells, 342
human, transport of triglyceride in high-density lipoproteins of, 260
inhibitor, and co-existent aplastic anemia, chronic mucocutaneous candidiasis with macrophage dysfunction, a, 968
insulin and glucose levels in diabetic rats prior to, and following islet transplantation, 75
platelet-rich, a time-dependent increase in responsiveness of, to epinephrine, 300
renin activity in chronic stable renal disease, control of, 637
samples, small, precise catecholamine assay for, 678
steroids, or steroid products, effect of, on adhesion of human opsonized thrombocytes to human leukocytes, 478
Platelets fixed with paraformaldehyde, new reagent for assay of von Willebrand factor and platelet aggregating factor, 318
rich plasma, a time-dependent increase in responsiveness of to epinephrine, 300
studies on gel-filtered human, isolation and characterization in medium containing no added Ca^{2+}, Mg^{2+}, or K^+, 811
Pneumonitis, hypersensitivity, immunologic studies in, quantitative precipitins and complement-fixing antibodies in symptomatic and asymptomatic pigeon breeders, 540
Polymorph random mobility, hemodialysis leukopenia and, possible correlation, 191
Porphyria, acute intermittent, studies using cultured human fibroblasts, porphyrin synthesis and mitochondrial respiration in, 93
Porphyrin, erythrocyte free, measurement of, as a simple means of distinguishing iron deficiency from beta-thalassemia trait in subjects with microcytosis, 113
synthesis and mitchondrial respiration in acute intermittent porphyria, studies using cultured human fibroblasts, 93
Precipitins, quantitative, and complement-fixing antibodies in symptomatic and asymptomatic pigeon breeders, immunologic studies in hypersensitivity pneumonitis, 540
serum, candida, clinical application of counterimmunoelectrophoresis in detection of, 161
Proline oxidase activity, radioisotopic assay for, 312
Prophylaxis, postexposure, in Type A hepatitis, potency of fragmented IgG, two studies of, 281
Proprionic and methylmalonic acids in urine, simplified and rapid quantitative assay for, 487
Prostaglandins and cyclic nucleotides, evidence supporting a role for, connective tissue activation, 392
Prostheses, Dacron, in canine thoracic aorta, scanning and transmission electron microscope study of luminal coating on, 208
Proteins, fibril, denatured, antigenicity, and cross-reactivity of, primary, secondary, and myeloma associated amyloids, 650
Pseudohyperkalemia and extreme leukocytosis, 660
Public opinion, effects on medical education and research, 8
Pulmonary hydrogen (H_2) measurements, investigation of small bowel transit time in man utilizing, 546
Pyruvate, inosine, and inorganic phosphate, effect of, on 2,3-diphosphoglycerate, adenine, and hypoxanthine nucleotide synthesis in outdated human erythrocytes, 436

R

Rabbits, antagonism between chloramphenicol and penicillin in streptococcal endocarditis in, 307
heart preparation, automatic device for isolated, for testing cardioactive drugs, 703
renal cortex, large-scale isolation of renin-containing granules by zonal centrifugation, 467
Radioimmunoassay of human growth hormone using ethanol-ammonium acetate, sensitive, rapid, and economic, 497
of LH and FSH, effect of pH on, 515
reactivity of derivatives of digoxin and digitoxin as measured by Na-K-ATPase displacement assay and by, 610
Radioiron probes, use of selective, study of chelating agent diethylenetriaminepentaacetic acid, using probes of reticuloendothelial and parenchymal iron stores, 913
Radioisotopic assay for proline oxidase activity, 312
Rats, alcoholic, distribution of zinc in skeletal muscle and liver tissue in normal and dietary controlled, 50
and mice, sequential blood samples from tail vein of, obtained with modified Liebig condenser jackets and vacuum, 523
diabetic, prior to and following islet transplantation, plasma insulin and glucose levels in, 75
in vivo hepatic and intestinal toxicity of sodium cyanate in, cyanate-induced alterations in hepatic glycogen metabolism, 140
liver, nitrogen metabolism of in perfused cirrhotic, 273
unilateral renal disease in, clinical, morphologic, and glomerular mesangial functional features of experimental model produced by renal perfusion with aminonucleoside, 756
Reabsorption, impaired renal tubular, of sodium in hypothyroid man, 451
Red blood cells, sorbitol-oxidizing enzyme of, 645
cell membrane in congenital dyserythropoietic anemia Type II (HEMPAS), abnormal lipid composition of, 34
cell superoxide dismutase activity, estimation of, 337
Redox potential changes in anaerobic culture media caused by addition of blood, measurement of, 174
Renal acidification, abnormal, in alcoholic liver disease, 987
cortex, rabbit, large-scale isolation of renin-containing granules by zonal centrifugation, 467
disease, chronic stable, plasma renin activity in control of, 637
unilateral, in rat, clinical, morphologic, and glomerular mesangial functional features of experimental model produced by renal perfusion with aminonucleoside, 756

Renal acidification—cont'd
papillary granule, morphological study of, analysis in interstitial cell and in the interstitium, 121
tubular reabsorption, impaired, of sodium in hypothyroid man, 451
Renin-containing granules, large-scale isolation of, from rabbit renal cortex by zonal centrifugation, 467
Research, public opinion, effects on medical education and, 8
Rheumatic fever, acute, salivary immunoglobulins and streptococcal antibodies in patients with, 1013
Rheumatoid behavior in normal human synovial fibroblast induced by extracts of Gram-negative bacteria, 422

S

Saliva of HB_sAg carriers, hepatitis B antigen in, 1042
Salivary immunoglobulins and streptococcal antibodies in patients with acute rheumatic fever, 1013
Secretory activity and aryl acid content of serum, urine, and cerebrospinal fluid in normal and uremic man, 723
Serum albumin, hyperoncotic human, anion excretion pattern following infusion of, into dogs, 416
blood, human, application of trace element analysis by x-ray fluorescence to, 155
chelated, studies of alternate pathway in, 904
dopamine-β-hydroxylase activity in parents and children, 566
in familial dysautonomia, 1008
new colorimetric assay for monoamine oxidase in, and its clinical application, 1022
precipitins, candida, clinical application of counterimmunoelectrophoresis in detection of, 161
urine, and cerebrospinal fluid in normal and uremic man, secretory activity and aryl acid content of, 723
Shear stress, fragility of abnormal erythrocytes evaluated by response to, 67
Sickle cells, enhancement of filterability of, by cyanate, effect independent of oxygen saturation, 445
Skeletal muscle and liver tissue in normal and dietary controlled alcoholic rats, distribution of zinc in, 50
Sodium cyanate, in vivo hepatic and intestinal toxicity of, in rats, cyanate-induced alterations in hepatic glycogen metabolism, 140
Sorbitol-oxidizing enzyme of red blood cells, 645
Steroids, plasma, or steroid products, effect of, on adhesion of human opsonized thrombocytes to human leukocytes, 478
Streptococcal antibodies in patients with acute rheumatic fever, salivary immunoglobulins and, 1013
Sucrase, intestinal, activity, enhancement of, in experimental diabetes, role of intraluminal factors, 832
Superoxide, participation of, in bacterial killing by xanthine oxidase, biological defense mechanisms, evidence for, 235
radicals, quantitative aspects of production of, by phagocytizing human granulocytes, 245
Syndrome, hyperviscosity studies of, macroglobulinemia, 207
Synovial fibroblasts, human, normal, induced by extracts of Gram-negative bacteria, rheumatoid behavior in, 422

T

Taurine-conjugated bile acids, nonchromatographic colorimetric assay for total, application of measurements of glycine: taurine ratio in bile, 505
Thalassemia-beta, trait in subjects with microcytosis, measurement of free erythrocyte porphyrin as a simple means of distinguishing iron deficiency from, 113
Thoracic aorta, canine, scanning and transmission electron microscope study of luminal coating on Dacron prostheses in, 208
Thrombocytes, human opsonized, adhesion of, to human leukocytes, effect of plasma, steroids, or steroid products on, 478
Thrombopoietin production by human embryonic kidney cells in culture, 59
Thyroid function, peripheral, in Graves' disease, relationship of thyroxine turnover to other parameters of, 922
Thyroxine turnover, relationship of, to other parameters of peripheral thyroid function in Graves' disease, 922
Tissue, liver, and skeletal muscle in normal and dietary controlled alcoholic rats, distribution of zinc in, 50
Toxicity of sodium cyanate in rats, cyanate-induced alterations in hepatic glycogen metabolism, in vivo hepatic and intestinal, 140
Trace element analysis, application of, by x-ray fluorescence, human blood serum, 155
Transferrin-bound iron, in vivo evidence for functional heterogeneity of, studies in normal rats, 769
in pregnant rats, 785
Transplantation, islet, plasma insulin and glucose levels in diabetic rats prior to and following, 75
Triglyceride, transport of, in high-density lipoproteins of human plasma, 260
Type A hepatitis, potency of fragmented IgG, two studies of postexposure prophylaxis in, 281

U

Ultrafilter, hollow-fiber blood, in vitro transport characteristics of, kinetics of hemodiafiltration, 355
Urine, proprionic and methylmalonic acids in, simplified and rapid quantitative assay for, 487
serum, and cerebrospinal fluid in normal and uremic man, secretory activity and aryl acid content of, 723

V

von Willebrand factor and platelet aggregating factor, paraformaldehyde, platelets fixed with, new reagent for assay of, 318

W

Water handling, impaired, in chronic obstructive lung disease, 41

X

Xanthine oxidase, biological defense mechanisms, evidence for participation of superoxide in bacterial killing by, 235
X-ray fluorescence, to human blood serum, application of trace element analysis by, 155

Z

Zinc, distribution of, in skeletal muscle and liver tissue in normal and dietary controlled alcoholic rats, 50
Zonal centrifugation, large-scale isolation of renin-containing granules from rabbit renal cortex by, 467

Subject Index*

A

Acid mucopolysaccharides, sulfate-containing accumulation of, in I-cell fibroblasts, 672
Acidosis, renal tubular, incomplete syndrome of, induced by lithium carbonate, 386
Aciduria, orotic, determination of urinary carbamylaspartate and dihydro-orotate in normal subjects and in patients with hereditary, 1047
Albuminuria and proteinuria in normal mice and mice with immune complex glomerulonephritis, studies of, 920
Alcoholic intoxication, acute, mechanism for decreased resistance to infection by gram-negative organisms during, 253
Agglutination test, Streptozyme, with three specific neutralization tests, dynamics of immune response in rabbits immunized with streptococcal extracellular antigens, comparison of, 91
Allergy, drug, suspected, lymphocyte transformation tests with, 997
Alveolar cell carcinoma, lymphocyte-associated antigens in patients with, 490
Amebocyte lysate test, endotoxin, thrombin, and *Limulus*, 430
Amino acid transport in human leukemic leukocytes, adaptive enhancement of, studies with alpha-aminoisobutyric acid, 984
Aminoglycoside nephrotoxicity, experimental , 213
alpha-Aminoisobutyric acid, adaptive enhancement of amino acid transport in human leukemic leukocytes, studies with, 984
Anemia, sickle cell, urinary iron in patients with, 17
Animal research and shrinking dollar, 899
Anion, behavior of carbenicillin as nonreabsorbable, 183
  retained in uremia, inhibition of the membrane transport of folates by, 834
Antibodies, acquired serum opsonic, human immunity to *Neisseria gonorrhoeae*, 221
  lung, further studies on effect of, on pathogenesis of tuberculosis, 741
Antibody, pemphigoid, fixation of Clq and C4 by, complement system in bullous pemphigoid, 733
  response to Type 12 M protein of Group A streptococcus, characterization of, 713
  titers, anti-epithelial, influence of chrysotherapy on serum protein and immunoglobulin levels, rheumatoid factor, and, 962
Antigen, determination of von Willebrand's disease (factor VIII-related antigen) in plasma by quantitative immunoelectrophoresis, 152
  lymphocyte-associated, in patients with alveolar cell carcinoma, 490
  streptococcal- extracellular, dynamics of immune response in rabbits immunized with, comparison of the Streptozyme agglutination test with three specific neutralization tests, 91
alpha l-Antitrypsin studies in stored serum by presumed bacterial proteases, interference with 7
Aorta, rabbit, platelet adherence to damaged surface of, 551
Aspergillus endocarditis in rabbits, experimental, 746

*July, pp. 1-180; August, pp. 181-368; September, pp. 369-550; October, pp. 551-710; November, pp. 711-898; December, pp. 899-1076.

Autoantibodies, incidence and titers of antinuclear, antismooth muscle, and other, in blood donors, 259

B

B_{12} binders, measurement of unsaturated "granulocyte-related" (TCII) and (TC III) and "liver-related" (TC II), by instant batch separation using a microfine precipitate of silica (QUSO G32), 505

Ballistocardiographic indicators of prognosis, ischemic heart disease, 46

Bile acid kinetics, effect of chenodeoxycholic acid feeding on, and fecal neutral steroid excretion in patients with hyperlipoproteinemia Types II and IV, 595

Biomedical federation, 181

Blood cell separator, continuous-flow, effects on cancer patients of leukapheresis with, hematologic and immunologic parameters in vivo, 938 In vitro, 950

structure-function studies, light transmission and attenuation coefficients of suspensions of blood cells and model particles at rest and with stirring, 326

donors, incidence and titers of antinuclear, antismooth muscle, and other auto-antibodies in, 259

effect of uremia on rates of ethanol disappearance from, and on activities of ethanol-oxidizing enzymes, 931

pressure, effects of low level of dietary cadmium on, ^{24}Na, ^{42}K, and water retention in growing rats, 57

measurements, indirect, in rabbit, correlations with direct aortic and ear pressure, 1032

processor, Haemonetics, altered invitro functions of platelets prepared by, 315

Body water, total, extracellular fluid and, simultaneous determination of, I, 1003

plasma volume, red cell mass, and extracellular fluid, simultaneous determination of, before and after volume expansion in dog and man, volume studies, 1009

Bone marrow needle modification, Jamshidi, 535

mineral content, radial, with total body calcium in chronic renal failure, correlation of, 910

Bovine fibrinogen modified with ^{3}H-acetic anhydrine (^{3}H-AcOAc), 360

Broad-b disease (Type III), spectrum of electrophoretic mobility of very low density lipoproteins, role of slower migrating species in endogenous hypertriglyceridemia (Type IV hyperlipoproteinemia) and, 239

C

Cadmium, dietary, effects of low level of, on blood pressure, ^{24}Na, ^{42}K, and water retention in growing rats, 57

Calcium, in vitro uptake of, by dermis of patients with pseudoxanthoma elasticum, 638

magnesium, and phosphorus in human skin, micromethod for quantitative analysis of, 1056

serum, and parathyroid hormone, influence of, upon glucose metabolism in uremia, 435

total body, in chronic renal failure, correlation of radial bone mineral content with, 910

Calciuria, carbohydrate-induced, in patients with recurrent renal calculi, effect of thiazide diuretics on, 118

Calculi, renal, recurrent, effect of thiazide diuretics on carbohydrate-induced calciuria in patients with, 118

Candidiasis, inhibition of leukocyte candidacidal activity by serum from patients with disseminated, 657

Capillary tubes, plastic sealed, modification of Drummond microhematocrit centrifuge for use with, 533

Carbamylaspartate and dihydro-orotate, determination of urinary, in normal subjects and in patients with hereditary orotic aciduria, 1047

Carbenicillin, behavior of, as nonreabsorbable anion, 183

Carbohydrate-induced calciuria in patients with recurrent renal calculi, effect of thiazide diuretics on, 118

Carcinoma, alveolar cell, lymphocyte-associated antigens in patients with, 490

Cardiomyopathy, alteration by immunosuppression of early mortality in naturally occurring, 844

Centrifuge, Drummond microhematocrit, modification of, for use with plastic sealed capillary tubes, 533

Chediak-Higashi, blood leukocytes, lysosomal enzymes in normal and, 614

Chemotaxis, acute ethanol effect on, and other components of host defense, 24

as preparative technique for human polymorphonuclear leukocytes, 309

evaluation of cytocentrifuge method for measuring neutrophil, 703

Chenodeoxycholic acid effects of, and feeding on bile acid kinetics and fecal neural steroids excretion in patients with hyperlipoproteinemia Types II and IV, 595

Chromosomal abnormalities in progressive systemic sclerosis (scleroderma) with consideration of radiation effects, 300

Chrysotherapy, influence of, on serum protein and immunoglobulin levels, rheumatoid fever, and anti-epithelial antibody titers, 962

Clearance measurements, dialysis and, during clinical dialysis, a plea for standardization, 378

Clots, fibrin, rheological properties of, effects of fibrinogen concentration, Factor XIII deficiency, and Factor XIII inhibition, 644

Colony-stimulating factor, drug-induced inhibition of myeloid colony growth, protective effect of, 499

Complement system in bullous pemphigoid, fixation of Clq and C4 by pemphigoid antibody, 733

Coulter Thrombocounter, evaluation of, in counting platelets before and after contact with foreign surfaces and its use in thests of platelet retention, 863

Cushing's syndrome, apparently normal pituitary-adrenal suppressibility in, dexamethasone metabolism and plasma levels, 472

Cytocentrifuge method, evaluation of, for measuring neutrophil granulocyte chemotaxis, 703

Cystine and glutathione, enzymic reduction of, in cultivated human fibroblasts from normal subjects and patients with cystinosis, 422

Cystinosis, enzymic reduction of cystine and glutathione in cultivated human fibroblasts from normal subjects and patients with, 422

D

Degeneration of spinal cord, normal vitamin B_{12} turnover in subacute and, 667
Dengue hemorrhagic fever, evaluation of plasma kinin system in, 410
Deoxyhemoglobin S, kinetics of sol-gel transformation of, by continuous monitoring of viscosity, 564
Dermatophytes, transferrin, and iron, serum dermatophyte inhibitory component definitively identified as unsaturated transferrin, 204
Dermis, in vitro uptake of calcium by, in patients with pseudoxanthoma elasticum, 638
Dexamethasone and plasma levels, apparently normal pituitary-adrenal suppressiblity in Cushing's syndrome, 472
Dialysance and clearance measurements during clinical dialysis, a plea for standardization, 378
Dialysis, clinical, dialysance and clearance measurements during, a plea for standardization, 378
Dichloromethylene diphosphonate, ethane-l-hydroxy-l,l-diphosponate, and rickets in rats, effects of, 793
Dihydro-orotate and carbamylaspartate, determination of urinary, in normal subjects and in patients with hereditary orotic aciduria, 1047
Diet, manganese, tissue trace element and enzyme content in pigs fed a low, relationship between manganese and selenium, 132
Dipyridamole, inhibition of human platelet aggregation by, and two related compounds and its modification by acid glycoproteins of human plasa, 64
Diseases, infectious, present and future of clinical research in, 1
Diuretics, thiazide, effect of, on carbohydrate-induced calciuria in patients with renal calculi, 118
DNA synthesis, cerebral, in thiamine deficiency reversible impairment of, 77
Dog and man, simultaneous determination of plasma volume, red cell mass, extracellular fluid, and total body water before and after volume expansion in, volume studies, 1009
  insulin and glucose flux rates in, relation between, 683
Drug allergy, lymphocyte transformation tests with suspected, 997
Drummond microhematocrit, modification of, centrifuge, for use with plastic sealed capillary tubes, 533

E

Editorial, invited, 711
Electrophoretic mobility, spectrum of, of very low density lipoproteins: role of slower migrating species in endogenous hypertriglyceridemia (Type IV hyperlipoproteinemia) and broad-B disease (Type III), 239
Element, tissue trace, and enzyme content in pigs fed a low manganese diet, relationship between manganese and selenium, 132
Endocarditis, aspergillus, in rabbits, experimental, 746
Endotoxin, thrombin, and *Limulus* amebocyte lysate test, 430
Enzyme content and tissue trace element in pigs fed a low manganese diet, relationship between manganese and selenium, 132
  ethanol-oxidizing, effect of uremia on rates of ethanol disappearance from blood and on activities of, 931
Erythrocyte membrane, binding of intracellular protein to, during incubation, production of Heinz bodies, 722
Erythroid ferrochelatase activity, diminished, in propoporphyria, 126
Erythropoietin, human, studies on radioimmunoassay for, 140
  sepharose-bound, studies with anti-erythropoietin, 295
Estriol in pregnancy plasma, simple radioimmunoassay for unconjugated, 513
Ethane-l-hydroxy-l,l-diphosphonate, dichloromethylene diphosphonate, and rickets in rats, effects of, 793
Ethanol disappearance from blood and on activities of ethanol-oxidizing enzymes, effect of uremia on rates of, 931
  effect, acute, on chemotaxis and other components of host defense, 24
  thiamine transport across rat intestine, 803
Excretion, steroid, fecal neutral effect of chenodeoxycholic acid, feeding on bile acid kinetics, in patients with hyperlipoproteinemia (Types II and IV), 595
Extracellular fluid and total body water, simultaneous determination of, I, 1003

F

Factor XIII deficiency, Factor XIII inhibition, rheological properties of fibrin clots, effects of, fibrinogen concentration, and, 644
  inhibition, rheological properties of fibrin clots, effects of fibrinogen concentration, Factor XIII deficiency, and, 644
Fat absorption, intestinal, a lipid-soluble marker for estimation of, properties of glycerol-^{75}Se-triether, 286
Fecal neutral steroid excretion, effect of chenodeoxycholic acid feeding on bile acid kinetics and, in patients with hyperlipoproteinemia Types II and IV, 595
Federation, biomedical, 181
Fever, dengue hemorrhagic, evaluation of plasma kinin system in, 410
Fibrin clots, rheological properties of, effects of fibrinogen concentration, Factor XIII deficiency, and Factor XIII inhibition, 644
Fibrinogen, bovine, modified with ^{3}H-acetic anhydrine (^{3}H-AcOAc), 360
  concentration, Factor XIII deficiency, and Factor XIII inhibition, rheological properties of fibrin clots, effects of, 644
  fibrin complexes, in vitro formation and in vivo clearance of, 100
Fibroblasts, cultivated human, from normal subjects and patients with cystinosis, enzymic reduction of cystine and glutathione in, 422
  I-cell, accumulation of sulfate-containing acid mucopolysaccharides in, 672
Fluid, extracellular, plasma volume, red cell mass, and total body water, simultaneous determination of, before and after volume expansion in dog and man, volume studies, 1009
Folates, inhibition of membrane transport of, by anions retained in uremia, 834

G

Gammopathies, monoclonal, characterization of, a new approach, 266
Gastrin measurements, interlaboratory reproducibility of, by radioimmunoassay, 521

Gentamicin, radioimmunoassay, acetylating radioenzymatic assay, and microbioassay of, comparative study, 349
Glomerulonephritis, immune complex, albuminuria and proteinuria in normal mice and mice with, studies of, 920
Glucose and insulin flux rates in dog, relation between, 683
role of, in induction of hypoaminoacidemia in man, studies in normal, juvenile diabetic, and insuloma patients, 395
incubation studies on human red cells, utilizing, under various conditions, 605
intolerance in icteric rats and rabbits, two distinct patterns of, relationship to impaired liver mitochondria function, 38
metabolism in uremia, influence of serum calcium and parathyroid hormone upon, 435
Glutathione, and cystine, enzymic reduction of, in cultivated human fibroblasts from normal subjects and patients with cystinosis, 422
Glycerol-^{75}Se-triether, properties of, a lipid-soluble marker for estimation of intestinal fat absorption, 286
Glycoproteins, acid, inhibition of human platelet aggregation by dipyridamole and two related compounds and its modification by, of human plasma, 64
hormones, method of extraction for, from plasma for use in radioimmunoassays, 883
granuloma, isolation and chemical characterization of, inhibits macrophage phagocytosis, 1018
metabolism in human renal disease, serum glycoproteins and glycoprotein : glycosyl transferase levels in chronic renal failure, 764
Gram-negative organisms during acute alcoholic intoxication, mechanisms for decreased resistance to infection, 253
Granuloma glycoprotein, isolation and chemical characterization of, inhibits macrophage phagocytosis, 1018
Granulopoiesis, stimulation of, by liver macrophages, 112
Growth hormone secretion and sulfation factor activity in pseudohypoparathyroidism, 772

H

^{3}H-acetic anhydrine (^{3}H-AcOAc), bovine fibrinogen modified with, 360
Haemonetics blood processor, altered in vitro functions of platelets prepared by, 315
Haptoglobin, modification of hemoglobin-antihemoglobin reaction by, 777
Hb A_2 quantitation, comparison of methodologies for thalassemia screening by, 873
Heart disease, ischemic, ballistocardiographic indicators of prognosis in, 46
Heinz bodies, production of, binding of intracellular protein to erythrocyte membrane during incubation, 722
Hemochromatosis, distribution of storage iron as body iron stores expand in patients with, 479
Hemoglobin A_2, microchromatography of hemoglobins, simplified procedure for determination of, 700
antihemoglobin reaction by haptoglobin, modification of, 777
microchromatography of, an improved procedure for the detection of hemoglobins S and C at birth, 528
simplified procedure for determination of hemoglobin A_2, 700
Hemoglobin—cont'd
S and C, improved procedure for detection at birth, microchromatography of hemoglobins, 528
Hepatitis-B antigen, comparison of confirmation methods for, and nature of false-positives detected by ^{125}I-immunoglobulins, 690
Hexosaminidase A, nonenzymatic conversion of human, 195
Hormone, parathyroid, influence of serum calcium, and, upon glucose metabolism in uremia, 435
Host defense, acute ethanol effect on chemotaxis and other components of, 24
Hybridization, nucleic acid, specific detection and semiquantitation of micro-organisms in tissue by, characterization of method by application to model systems, 164
^{25}-Hydroxyvitamin D in rat, postnatal fall and rise of circulating, 32
Hyperlipoproteinemia, Types II and IV effect of chenodeoxycholic acid feeding on bile acid kinetics and fecal neutral steroid excretion in patients with, 595
Hypertriglyceridemia (Type IV hyperlipoproteinemia) and broad-B disease (Type III), spectrum of electrophoretic mobility of very low density lipoproteins, role of slower migrating species in endogenous, 239
Hypertension, essential, renal vein renin in, 901
Hypertensive care, renal, vasodilator responses to K^+ in genetic hypertensive and, 973
Hypoaminoacidemia, role of insulin and glucose in induction of, in man, studies in normal, juvenile diabetic, and insuloma patients, 395
Hypogeusia, idiopathic, estimation of zinc concentration of parotid saliva by flameless atomic absorption spectrophotometry in normal subjects and in patients with, 175
Hypoxia-induced thrombocytopenia in mice, 230

I

I-cell fibroblasts, accumulation of sulfate-containing acid mucopolysaccharides in, 672
^{125}I-immunoglobulins, comparison of confirmation methods for hepatitis-B antigen and the nature of false-positives detected by, 690
Ig classes G, A, M, D, and E in spinal fluids, normal values of different age groups, radioimmunoassays for, 887
Immunoelectrophoresis, quantitative, determination of von Willebrand's disease antigen (factor VIII-related antigen) in plasma by, 152
Immunoglobulin and protein serum levels, rheumatoid factor, and anti-epithelial antibody titers, influence of chrysotherapy on, 962
Immunosuppression of early mortality in a naturally occurring cardiomyopathy, alteration by, 844
Incubation, binding of intracellular protein to the erythrocyte membrane during, the production of Heinz bodies, 722
Inosine or glucose, incubation studies on human red cells utilizing glucose or, under various conditions, 605
Insulin and glucose flux rates in dog, relation between, 683
role of, in induction of hypoaminoacidemia in man, studies in normal, juvenile diabetic, and insuloma patients, 395
degradation of, in serum by insulin-specific protease, 631

Intestine, rat, thiamine transport across, effect of ethanol, 803
Intoxication, alcoholic, acute, mechanism for decreased resistance to infection by gram-negative organisms during, 253
Iron, storage, distribution of, as body iron stores expand in patients with hemochromatosis, 479
transferrin, and dermatophytes, serum dermatophyte inhibitory component definitively identified as unsaturated transferrin, 204
bound, in vivo evidence for functional heterogeneity of, studies of transferrin at high and low iron saturation, 576
Iron, urinary, in patients with sickle cell anemia, 17

J

Jamshidi bone marrow needle modification, 535

K

K^+, vasodilator responses to, in genetic hypertensive and in renal hypertensive care, 973
Kinetics, bile acid, effect of chenodeoxycholic acid feeding on, and fecal neutral steroid excretion in patients with hyperlipoproteinemia, Types II and IV, 595
of sol-gel transformation of deoxyhemoglobin B by continuous monitoring of viscosity, 564

L

Leukapheresis, effects on cancer patients of, with continuous-flow blood cell separator, hematologic and immunologic parameters in vivo, 938 In vitro, 950
Leukocytes, adaptive enhancement of amino acid transport in human leukemia, studies with alpha-aminoisobutyric acid, 984
candidacidal activity, inhibition of, by serum from patients with disseminated candidiasis, 657
Chediak-Higashi blood, lysosomal enzymes in normal and, 614
human polymorphonuclear (PMN), subcellular distribution of introblue tetrazolium reductase (NBT-R) in, 785
migration in vivo, new method of study, 1040
phagocytic oxidase activity by measurement of initial rate of stimulated oxygen consumption, 586
phagocytosis, quantitation by rapid radioactive method, 344
polymorphonuclear, chemotaxis as preparative technique for human, 309
Light transmission and attenuation coefficients of suspensions of blood cells and model particles at rest and with stirring, blood cell structure-function studies, 326
Limulus amebocyte lysate test, endotoxin, and thrombin, 430
Lipids, tissue, dietary, plasma, hepatic, and adipose, temporal relationship between, after short-term feeding of safflower oil to rats, 369
Lipoproteins, very low density, spectrum of electrophoretic mobility of, role of slower migrating species in endogenous hypertriglyceridemia (Type IV hyperlipoproteinemia) and broad-B disease (Type III), 239
Lithium administration in rats, renal effects of, alterations in water and electrolyte metabolism and the response to vasopressin and cyclic-adenosine monphosphate during prolonged administration, 445
carbonate, incomplete syndrome of renal tubular acidosis induced by, 386
Liver macrophages, stimulation of granulopoiesis by, 112
mitochondria function, relationship to, impaired, two distinct patterns of glucose intolerance in icteric rats and rabbits, 38
resection, effect of massive, on platelet kinetics in rat, 817
Lung antibodies, further studies on effect of, on pathogenesis of tuberculosis, 741
Lymphocyte-associated antigens in patients with alveolar cell carcinoma, 490
transformation tests and suspected drug allergy, 997
Lysosomal enzymes in normal and Chediak-Higashi blood leukocytes, 614

M

Macrophages, liver, stimulation of granulopoiesis by, 112
phagocytosis, isolation and chemical characterization of granuloma glycoprotein that inhibits, 1018
Magnesium, calcium, and phosphorus in human skin, micromethod for quantitative analysis of, 1056
Manganese diet, tissue trace element and enzyme content in pigs fed a low, relationship between manganese and selenium, 132
Membrane, erythrocyte, binding of intracellular protein to, during incubation, production of Heinz bodies, 722
transport, inhibition of, of folates by anions retained in uremia, 834
Mice, hypoxia-induced thrombocytopenia in, 230
proteinuria and albuminuria in normal, and with immune complex glomerulonephritis, studies of, 920
Microbioassay, radioimmunoassay, and acetylating radio-enzymatic assay, of gentamicin, comparitive study, 349
Microchromatography of hemoglobins, an improved procedure for the detection of hemoglobins S and C at birth, 528
simplified procedure for determination of hemoglobin A_2, 700
Microhematocrit centrifuge, Drummond, modification of, for use with plastic sealed capillary tubes, 533
Micro-organisms, specific detection and semiquantitation of, in tissue by nucleic acid by hybridization, characterization of method by application to model system, 164
Microsieving, deformability of sickle cells as studied by, 274
Mitochondria function, liver, impaired, relationship to, two distinct patterns of glucose intolerance in icteric rats and rabbits, 38
Monoclonal gammopathies, characterization of, a new approach, 266
Mortality, early, in naturally occurring cardiomyopathy, alteration by immunosuppression of, 84
Myeloid colony growth, drug-induced inhibition of, protective effect of colony-stimulating factor, 499

N

Na^+ and Cl^- activities, source of, on skin surface, 494
Neisseria gonorrhoeae, human immunity to, acquired serum opsonic antibodies, 221
Nephrotoxicity, experimental aminoglycoside, 213
Neutrophil granulocyte chemotaxis, evaluation of cytocentrifuge method for measuring, 703

Nitroblue tetrazolium reductase (NBT-R) in human polymorphonuclear leukocytes (PMN), subcellular distribution of, 785
Nucleic acid hybridization, specific detection and semiquantitation of micro-organisms in tissue by, characterization of method and application to model systems, 164

O

Opsonic antibodies, serum, acquired, human immunity of *Neisseria gonorrhoeae*, 221
Organisms, gram-negative, during acute alcoholic intoxication, mechanism for decreased resistance to infection, 253
Orotic aciduria, determination of urinary carbamylaspartate and dihydro-orotate in normal subjects and in patients with hereditary, 1047
Oxygen consumption, stimulated, of initial rate of stimulated oxygen consumption, 586

P

^{32}P-orthophosphate, incorporation of, into total and individual plasma phospholipids in patients with polycythemia vera, 280
Parathyroid hormone, influence of serum calcium and upon glucose metabolism in uremia, 435
Parotid saliva, estimation of zinc concentration of, by flameless atomic absorption spectrophotometry in normal subjects and in patients with idiopathc hypogeusia, 175
Pemphigoid, bullous, complement system in, fixation of Clq and C4 by pemphigoid antibody, 733
Phagocytosis, macrophage, isolation and chemical characterization of granuloma glycoprotein that inhibits, 1018
polymorphonuclear leukocyte, quantitation by rapid radioactive method, 344
Phospholipids, plasma, in patients with polycythemia vera, incorporation of (^{32}P)-orthophosphate into total and individual, 280
Phosphorus, calcium, and magnesium, in human skin, micromethod for quantitative analysis of, 1056
Pigs, tissue trace element and enzyme content in, fed a low manganese diet, relationship between manganese and selenium, 132
Pituitary-adrenal suppressibility in Cushing's syndrome, apparently normal, dexamethasone metabolism and plasma levels, 472
Plasma, determination of von Willebrand's disease antigen (factor VIII-related antigen) in, by quantitative immunoelectrophoresis, 152
human, inhibition of human platelet aggregation by dipyridamole and two related compounds and its modification by acid glycoproteins of, 64
kinin system in dengue hemorrhagic fever, evaluation of, 410
levels, and dexamethasone, apparently normal pituitary-adrenal suppressibility in Cushing's syndrome, 472
method for extraction of glycoprotein hormones from, for use in radioimmunoassays, 883
phospholipids in patients with polycythemia vera, incorporation of (^{32}P)-orthophosphate into total and individual, 280
pregnancy, radioimmunoassay, simple, for unconjugated estriol in, 513
volume, red cell mass, extracellular fluid, and total body water, simultaneous determination of, before and after volume expansion in dog and man, volume studies, 1009
Platelet adherence to damaged surface of rabbit aorta, inhibition of, 551
aggregation, human, inhibition of, by dipyridamole and two related compounds and its modification by acid glycoproteins, of human plasma, 64
altered in vitro functions of, prepared by Haemonetics blood processor, 315
human, morphological, biochemical, and functional changes in, subjected to shear stress, 462
kinetics in rat, effect of massive liver resection in, 817
retention, evaluation of Coulter Thrombocounter in counting platelets before and after contact with foreign substances and its use in tests of, 863
Polycythemia vera, incorporation of (^{32}P)-orthophosphate into total and individual plasma phospholipids in patients with, 280
Polymorphonuclear leukocytes, chemotaxis as preparative technique for human, 309
phagocytosis, quantitation by rapid radioactive method, 344
Postural change, acute, sequential responses of renin-angiotensin-aldosterone axis to, effect of dietary sodium, 754
Proteases, bacterial, interference with alpha-l-antitrypsin studies in stored serum by presumed, 7
degradation of insulin in serum by insulin-specific, 631
Protein, intracellular, binding of, to erythrocyte membrande during incubation, the production of Heinz bodies, 722
serum, and immunoglobulin levels, rheumatoid factor, and anti-epithelial antibody titers, influence of chrysotherapy on, 962
Type 12 M, of group A streptococcus, characterization of antibody response to, 713
Proteinuria and albuminuria in normal mice and mice with immune complex glomerulonephritis, studies of, 920
Protoporphyria, diminished erythroid ferrochelatase activity in, 126
Pseudohypoparathyroidism, growth hormone secretion and sulfation factor activity in, 772
Pseudomonas and *Serratia*, comarison of methods for assessing in vitro antibiotic synergism against, 853
Pseudoxanthoma elasticum, in vitro uptake of calcium by dermis of patients with, 638
Pulmonary residual volume determinations, differential, with radioactive xenon, 160

R

Rabbits and rats, icteric, two distinct patterns of glucose intolerance in, relationship to impaired liver mitochondria function, 38
aorta, platelet adherence to damaged surface of, 551
dynamics of immune response in, immunized with streptococcal extracellular antigens, comparison of the Streptozyme agglutination test with three specific neutralization tests, 91
experimental aspergillus endocarditis in, 746
indirect blood pressure measurements in, correlations with direct aortic and ear pressure, 1032
Radial bone mineral content with total body calcium in chronic renal failure, correlation of, 910
Radiation effects, chromosomal abnormalities in progressive systemic sclerosis (scleroderma) with consideration of, 300

Radioactive method, polymorphonuclear leukocyte phagocytosis, quantitation by rapid, 344
Radio-enzymatic assay, acetylating, and microbioassay of gentamicin, comparative study, radioimmunoassay, 349
Radioimmunoassay, acetylating radio-enzymatic assay, and microbioassay of gentamicin, comparative study, 349
for human erythropoietin, studies on, 140
Ig classes G, A, M, D, and E in spinal fluids, normal values of different age groups, 887
interlaboratory reproducibility of gastrin measurements by, 521
method for extraction of glycoprotein hormones from plasma for use in, 883
samples, simplified approach for processing large numbers of, 1052
simple, for unconjugated estriol in pregnancy plasma, 513
Rats and rabbits, icteric, two distinct patterns of glucose intolerance in, relationship to impaired liver mitochondria function, 38
effects of a low level dietary cadmium of blood pressure, ^{24}Na, ^{42}K, and water retention in growing, 57
dichloromethylene diphosphonate, ethane-l-hydroxy-l,l-diphosphonate, and rickets in, 793
massive liver resection on platelet kinetics in, 817
intestine, thiamine transport across, effect of ethanol, 803
postnatal fall and rise of circulating 25-hydroxy-vitamin D in, 32
renal effects of litium administration in, alterations in water and electrolyte metabolism and the response to vasopressin and cyclic-adenosine monophosphate during prolonged administration, 445
temporal relationships between dietary, plasma, hepatic, and adipose tissue lipids after short-term feeding of safflower oil to, 369
Red cell mass, plasma volume, extracellular fluid, and total body water, simultaneous determination of, before and after volume expansion in dog and man, volume studies, 1009
Renal calculi, recurrent, effect of thiazide diuretics on carbohydrate-induced calciuria in patients with, 118
disease, human, glycoprotein metabolism in, serum glycoproteins and glycoprotein: glycosyl transferase levels in chronic, 764
effects of lithium administration in rats, alterations in water and electrolyte metabolism and the response to vasopressin and cyclic-adenosine monophosphate during prolonged administration, 445
failure, chronic, correlation of radial bone mineral content with total body calcium in, 910
hypertensive care, vasodilator responses to K^+ in genetic hypertensive and, 973
tubular acidosis, incomplete syndrome of, induced by lithium carbonate, 386
vein renin in essential hypertension, 901
Renin-angiotensin-aldosterone axis to acute postural change, sequential responses of, effect of dietary sodium, 754
renal vein, in essential hypertension, 901
Rheological properties of fibrin clots, effects of fibrinogen concentration, Factor XIII deficiency, and Factor XIII inhibition, 644
Rheumatoid factor, and anti-epithelial antibody titers, influence of chrysotherapy on serum protein and immunoglobulin levels, 962
Rickets, dichloromethylene diphosphonate, and ethane-l-hydroxy-l,l-diphosphonate, in rats, effects of, 793

S

Safflower oil, feeding of, to rats, temporal relationships between dietary, plasma, hepatic, and adipose tissue lipids after short-term, 369
Saliva, parotid, estimation of zinc concentration of, by flameless atomic absorption spectrophotometry in normal subjects and in patients with idiopathic hypogeusia, 175
Sclerosis, systemic, chromosomal abnormalities in progressive (scleroderma) with consideration of radiation effects, 300
Selenium, tissue trace element and enzyme content in pigs fed a low manganese diet, relationship between manganese and, 132
Separator, continuous-flow blood cell, effects on cancer patients of leukapheresis with, hematologic and immunologic parameters in vivo, 938 In vitro, 950
Sepharose-bound erythropoietin, studies with anti-erythropoietin, 295
Serratia and *Pseudomonas*, comparison of methods for assessing in vitro antibiotic synergism against, 853
Serum calcium and parathyroid hormone, influence of, upon glucose metabolism in uremia, 435
degradation of insulin in, by insulin-specific protease, 631
dermatophyte inhibitory component definitively identified as unsaturated transferrin, transferrin, iron, and dermatophytes, 204
inhibition of leukocyte candidacidal activity by, from patients with disseminated candidiasis, 657
opsonic antibodies, acquired, human immunity to *Neisseria gonorrhoeae*, 221
protein and immunoglobulin levels, rheumatoid factor, and anti-epithelial antibody titers, influence of chrysotherapy on, 962
stored, interference with alpha-l-antitrypsin studies in, by presumed bacterial proteases, 7
Shear stress, morphological, biochemical, and functional changes in human platelets subjected to, 462
Sickle cell anemia, urinary iron in patients with, 17
deformability of, as studied by microsieving, 274
Silica (QUSO G32), measurement of unsaturated "granulocyte-related" (TC I) and (TC III) and "liver-related (TC II) B_{12} binders by instant batch separation using a microfine precipitate of, 505
Skin, human, micromethod for quantitative analysis of calcium, magnesium, and phosphorus in, 1056
surface, source of Na^+ and Cl^- activities on, 494
Sodium, dietary, effect of, sequential responses of renin-angiotensin-aldosterone axis to acute postural change, 754
Sol-gel transformation, kinetics of, transformation of deoxyhemoglobin S by continuous monitoring of viscosity, 564
Spectrophotometry, flameless atomic absorption, in normal subjects and in patients with idiopathic hypogeusia, estimation of zinc concentration of parotid saliva by, 175
Spinal cord, normal vitamin B_{12} turnover in subacute combined degeneration of, 667

Spinal—cont'd
fluids, radioimmunoassays for Ig classes G, A, M, D, and E in, normal values of different age groups, 887
Steroid excretion, fecal neutral, effect of chenodeoxycholic acid feeding on bile acid kinetics, in patients with hyperlipoproteinemia Types II and IV, 595
Streptococcus, Group A, characterization of the antibody response to Type 12 M protein of, 713
Streptozyme agglutination test with three specific neutralization tests, dynamics of immune response in rabbits immunized with streptococcal extracellular antigens, comparison of, 91
Subcellular distribution of nitroblue tetrazolium reductase (NBT-R) in human polymorphonuclear leukocytes (PMN), 785
Sulfation factor activity and growth hormone secretion in pseudohypoparathyroidism, 772
Synergism, antibiotic, against *Pseudomonas* and *Serratia*, comparison of methods for assessing in vitro, 853

T

Test, amebocyte lysate, endotoxin, thrombin, and *Limulus*, 430
Thalassemia screening, comparison of methodologies for, by Hb A_2 quantitation, 873
Thiamine deficiency, reversible impairment of cerebral DNA synthesis in, 77
transport across rat intestine, effect of ethanol, 803
Thiazide diuretics, effect of, on carbohydrate-induced calciuria in patients with recurrent renal calculi, 118
Thrombin, endotoxin, and *Limulus* amebocyte lysate test, 430
Thrombocytopenia, hypoxia-induced, in mice, 230
Tissue lipids, dietary, plasma, hepatic, and adipose, temporal relationship between, after short-term feeding of safflower oil to rats, 369
specific detection and semiquantitation of microorganisms in, by nucleic acid hybridization, characterization of method and application to model systems, 164
trace element and enzyme content in pigs fed a low manganese diet, relationship between manganese and selenium, 132
Transferrin-bound iron, in vivo evidence for functional heterogeneity of, studies of transferrin at light and low iron saturation), 576
Transferrin—cont'd
iron, and dermatophytes, serum dermatophyte inhibitory component definitively identified as unsaturated transferrin, 204
Triiodothyronine, measurement of, in unextracted urine, 538
Tuberculosis, pathogenesis of, further studies on effect of lung antibodies on, 741
Tubes, plastic sealed capillary, modification of Drummond microhematocrit centrifuge for use with, 533
Type 12 M protein of Group A streptococcus, characterization of antibody response to, 713

U

Uremia, effect of, on rates of ethanol disappearance from blood and on activities of ethanol-oxidizing enzymes, 931
influence of serum calcium and parathyroid hormone upon glucose metabolism and, 435
inhibition of membrane transport of folates by anions retained in, 834
Urine, unextracted, measurement of triiodothyroine in, 538

V

Vasodilator responses to K^+ in genetic hypertensive and in renal hypertensive care, 973
Vein, renal, renin in essential hypertension, 901
Viscosity, continuous monitoring of, kinetics of sol-gel trans formation of, 564
Vitamin B_{12}, normal, turnover in subacute combined degeneration of spinal cord, 667
von Willebrand's disease antigen (factor VIII-related antigen), determination of, in plasma by quantitative immunoelectrophoresis, 152

W

Water retention in growing rats, effects of low level of dietary cadmium on blood pressure, 24 Na, 42 K, and, 57
total body, extracellular fluid and, simultaneous determination of, I, 1003

X

Xenon, radioactive, pulmonary residual volume determin ations with, differential, 160

Z

Zinc concentration, estimation of, in parotid saliva by flameless atomic absorption spectrophotometry in normal subjects and in patients with idiopathic hypogeusia, 175
